Predmet: INTENTION LETTER

Dear Sirs!

Based on our conversation, we're ready to offer our workshop repair of an elevator motors from the exploitation platforms in the northern Adriatic.

Workshop includes input detection, repair and testing and repair or create new, damaged parts.

Repairs are made in accordance with prescribed procedures.

We're certified and approved by Ex-Agency for the repair of electrical machinery and apparatus in explosion proof.

## Company activities:

All kinds of repairing and servicing of electrical rotating machines, made by all world famous companies (induction, synchronous, DC, schrage) in all arrangements, for all purposes and r.p.m

- production and changing of all types of stator and rotor coils in heat classes "F" and "H" for ordinary and aggressive atmospheres
- servicing of electrical machines with uprating of insulating system, impregnation of coils in pitch and varnishes of heat classes "F" and "H"
- repairs and servicing of locomotive electrical drag motors and generators
- repairs and winding of collector aligned and rotor fed schrage motors
- repairs and winding of high frequency rotor converters
- production of spare equipment parts, coils, collectors, iron core, bearings' shields, shafts etc.
- regeneration friction surfaces
- dynamic balancing
- testing and analysing of operating machine
- preventive maintenance
- repairs and servicing at customers' sites
- brush headers regeneration and repairs
- electromagnets repairs
- transformers and chokes repairs
- pumps repairs
- engineering consulting

Attached to deliver:

- ISO 9001-2000 copy of certificate
- copy of the findings of Ex - Agency

- list of tools and measuring equipment
- list of stuff

Dear business partners!

Basic guarantee for our reliability and the quality of our work is the long working experience of the founders of our company.

Their experience is based on their many years of designing, constructing, producing, maintaining and servicing of the big rotating machinery.

All the work is done at our premises in Prigornica 2, 10090 Zagreb, in three working halls (631m<sup>2</sup>) fully equipped with modern equipment for installation, deinstallation, troubleshooting, detection and testing.

All the work is done by applying the latest modern scientific developments, as well as the result of our own work, through knowledge of electrical machines and many years of experience.

The skilled staff consist of experts (highly qualified electrical and mechanical engineers) with long experience in production, maintenance and servicing of electrical motors.

In the process, as well as the maintenance work at your premises, we use the latest modern testing equipment for troubleshooting and final testing of electrical motors.

Materials, the repair equipment and parts that we use are confirmed products of well-known manufacturers.

Besides electrical service we can offer mechanical service entirely at your own.

All the work is done expertly and quickly, with excellent timing, which enables us to have competitive prices. Our huge experience, quality of our work, timing and low prices, make solid basics for the well-done job and are the guarantee of the customer's satisfaction.

Looking forward to our successful cooperation,  
Yours faithfully!

ELTRA MG d.o.o.
